Bulletins

This publication is much more than just a newsletter. Published twice a year, in February and August, it contains news, short articles, reviews, pictures and more. The Spring 2009 edition won the Newsletter Award from the Association of Industrial Archaeology.

The Bulletin is the original Journal of the Society and has been produced since 1976. We are currently in the process of digitising past copies. Bulletins are now reserved for longer pieces of research and do not have a regular Publication date. The Bulletin pictured above won The Association for Industrial Archaeology award for Journals In 2008.
